

Flags and banners

Original aluminum cross-section

33 mm

MASTERFLAG® is Zingerlemetal's latest development in the field of flags and banners for events. The stable 33 mm aluminum cross-section in conjunction with the patent-pending folding mechanism enables deployment within seconds.

MASTERFLAG® can be fitted to the tent, but can also be erected to stand independently using a sturdy four-legged support or ground anchor.

MASTERFLAG® Advantages:

- Flags and banners are ideal for promotion purposes, especially for improving the visibility of your logo (from a distance) and therefore to generate more interest. The infinite possibilities of digital printing leave no wish unfulfilled.
- Can be individually printed (logos, images, products etc.) and the aluminium cross-sections are available in seven colors.
- Flags and banners can be easily exchanged. This means that one MASTERTENT® can be used with multiple flags/banners.
- Easy transport and setup.

< 60 sec.
